

PRA Behind the Research: Michael Fleischhauer and Misha Lukin on “Quantum memory for photons: Dark-state polaritons”

When: July 14, 2020 | 2:00PM EDT

Join Michael Fleischhauer, University of Kaiserslautern, Germany and Misha Lukin, Harvard University, USA, for an informative and engaging discussion of the interesting story behind their paper "[Quantum memory for photons: Dark-state polaritons](#)." Fleischhauer and Lukin will provide details on how their seminal work was published in Physical Review A, and how it later influenced the quantum physics community. Discuss quantum research, publishing, and much more with the authors. This is the second in a [series of webinars](#) with authors of groundbreaking research published in PRA. Registration is free.
